

ABOUT ETHOTECH:

EthoTech has been designing enhancements for Microsoft Dynamics GP for more than a decade. Our premier product, Commission Plan, is recognized worldwide as the leader in automated commission management systems. Commission Plan eliminates complex spreadsheets and the need for highly error-prone manual processes when calculating and paying commissions. All EthoTech products provide seamless integration built right into Microsoft Dynamics GP, so each will increase your company's productivity by up to 68% while boosting its morale. We now have over 600 Partners recommending EthoTech to over 1,100 customers in hundreds of industries worldwide. It's no wonder we're a member of Microsoft Dynamics President's Club for several years running.

PRODUCTS AND SERVICES WE OFFER:

Commission Plan - A completely automated commission management system that eliminates complex spreadsheets and the need to perform highly error-prone manual processes in calculating and paying commissions

Next Numeric Collection – Auto-assigns the next number needed for master record types: customers, vendors, inventory items, fixed assets, employees, salespeople, prospects, Project Accounting contract IDs, Project Accounting project IDs, WennSoft job numbers, and Receivables, Sales and Purchasing Batch IDs.

Customer Service Collection - No more entering duplicate customer orders, shipping products to customers who've exceeded their credit limit, or promising immediate shipment when an item is out of stock. Now you can automatically check for duplicate purchase orders, assign credit limit process holds, even move multiple sales documents from one batch to another.

Enhanced Password Security - Ensures the protection of your valuable financial data while supporting SOX compliance mandates through additional lock out options, greater control over password complexity and enhanced security settings.

SmartSort - Speed up your inquiries — and your data entry — by *eliminating as many as 3 mouse clicks per lookup*. Quickly find the information you need by customizing each user's view based on built-in advanced sorting options or SmartList favorites.

Commission Plan Implementation & Customization Services – EthoTech provides implementation and customization as a supplement to the services offered by your Microsoft Partner. We're here to assist in meeting deadlines and enhancing the resources available to end users.
